

Vizual to People Inc.

With the recent withdrawal of support for Windows XP we have been contacted by significant number of Personnel Manager and Personnel Director users; the Vizual software is no longer supported on any newer Windows operating systems.

Our upgrade offer for Vizual HR software (including Personnel Manager and Personnel Director) is still available. A significant discount on the standard licence fees applies to upgrades.

Some background about us

P&A Software supplied Vizual Personnel Manager and Personnel Director to our clients in the UK between 1999 and 2009 when these systems were withdrawn from sale. We now supply our People Inc. system in their place and offer an upgrade to this product to existing Personnel Manager and Personnel Director users.

About People Inc.

The People Inc. system provides a wealth of functionality that is not available via Personnel Manager or Personnel Director, including:

- Personnel, Recruitment, and Training course management all in one system.
- Screen designer providing significant additional features.
- Updated management of maternity and paternity leave (in line with legislation).
- Enhanced report writer with much-improved headcount and absence reporting.
- Enhanced performance enabling remote access.
- Absence can be managed at a daily level (providing far greater potential on absence reports)
- A customisable web client enabling users to access PI using a web browser.
- Enhanced e-mail and letter generation.
- Custom features can now be added to People Inc. using plug-ins and wizards.
- User account management is based on templates in version 3.4.
- Windows 7, Windows 8, Office 2010, and SQL Server 2005/2008 are supported.
- The look and feel has been enhanced with Windows 7 in mind.

Note that People Inc. is not a newer version of Personnel Manager or Personnel Director; it is a newly designed and developed system. During the migration of data into People Inc. we ensure that all information and attachments are transferred.
